

**Letter of Recommendation****To the Admissions Committee,**

I am pleased to recommend Ms. Arushi Kumari, who worked under my supervision as an Intern (Maintenance Engineer) on the SWSM Water Supply Project at NCC Limited, Hardoi (U.P.)

During her internship, Arushi demonstrated strong technical aptitude and reliability. She assisted in the installation of pump-room systems, contributed to Overhead Tank fabrication, and gained practical exposure to solar-powered water-supply operations. Her ability to quickly grasp on-site mechanical procedures and translate them into process documentation was impressive.

Arushi displayed a rare combination of hands-on skill and system-level understanding. She often proposed small but effective improvements to workflow efficiency and safety practices. Her attitude was consistently positive, collaborative, and professional.

I firmly believe Arushi will excel in any demanding academic and research environment, bringing the same diligence and innovative spirit she exhibited here.

Sincerely,

**Regards  
For, NCC limited.**
